Apologies. I should have been clearer. I wasn't even thinking about time zones that when I wrote you my initial email.

Mike G. has other meetings today. Perhaps you and I could talk very briefly either later this afternoon or tomorrow about the Mike G.'s slides and if you think they are about right? How late do you expect to be at the office today?

Mike did look at the topics provided by Beth Law and is familiar with them. I indicated that these would likely be covered in the Executive Board meeting.

David.

David,

I have the call scheduled for 12:30pm Central Time. I am so sorry for the confusion. I am currently on a call but can call when I'm off.

Rick

Subject: RE: Upcoming CSPA meeting in Ft. Lauderdale

Hello all,

Please see attached set of draft slides for Mike Goodis' presentation for discussion/review. Meant to fill ~ 30 minutes. Questions can be taken either afterwards or during ca. 30 minute Panel Discussion period.

My slides for ca. 30 minute slot will cover Spot-ons and are not done yet – will be essentially the same as the AHS presentation in October in Bethesda

No slides intended for Mike G. for Executive Board Meeting.

We will discuss at 12:30 tomorrow (Thursday) at number provided below/earlier and reproduced here:

Call in number –

Ex. 6 Personal Privacy (PP)

Then Ex. 6 Personal Privacy (PP)

Hello Rick,

It will be Mike Goodis, Shanna Recore, and me. Since I've added Shanna, we should do this via conference call. And I have scheduled it from 12:30 to 1:15 on Thursday 01 December. I will aim to get you a draft copy of the slides NLT COB Wednesday.

I just heard back from Mike G. Your 12:30 slot on Thursday is do-able, so let's plan on that. We will be in a conference room, so it might be best for us to call you. If we add anybody else here, I will send out a conference call number we can dial in on.

David,

That would work great. I could do 12:30pm on Thursday or most anytime on Friday.

Let me know if that works on your end.

Hello Rick,

Do you think you might have some time later this week – perhaps 30 minutes or so – for you, me, and Mike Goodis to talk some about the CSPA meeting next week. Specifically, Mike thought it would be good for us to discuss any issues that you thought might come up, logistics, review of topics, etc.

I will be able to send you a draft version of Mike G's slides perhaps late tomorrow, so we could add that to the discussion, too.

Are there any particular times later this week you are not available or are not good for you?

David.

Do you want to call me or should I call you?

I can let you know what we briefed Mike G. on. And you could let me know if there are other areas of interest that Mike G. may want to know about. Also – Mike really wants to know more about what is expected: he is scheduled for two sessions and it has not been made clear (at least yet) what the expectations are and if he needs to have a formal presentation prepared vs. just addressing directed questions as part of a panel. Or something in between.

Hello David,

A phone call tomorrow would be great. I'm available tomorrow afternoon if that works for you. Any time after 11am Central Time would work for me. Why don't we plan on noon my time, 1pm your time. If that doesn't work, just let me know.

My best,

Rick

Hello Rick,

I don't know if we sent a message on this (apologies if you did, but I didn't see it), but are you available to talk pretty much anytime tomorrow (Friday). We briefed Mike Goodis yesterday on our incident work for the CSPA meeting. It went well, but he still has some logistics questions about exactly what is expected from him (panel member?, power point presentation? Both? Neither, but something else?). Anyway, I offered to speak to you to see if you knew any more. We touched on what we thought would be good things to know, but I wanted to check with you to see if you had any additional information that might help. We did get a couple months back some suggested topic issues from CSPA's Beth Law and haven't received much from them since. And -except for spot-ons - it really was more admin stuff than anything else. So we are interested in seeing if you might have some thoughts on more current issues that you think might come up, might be of interest, or might be worthy of some attention by Mike G.

Anyway, please let me know if you are available tomorrow to talk. I could also discuss more specifics re: the Spot-ons pilot. Except for one company that has asked to reschedule, we have them all scheduled now (on a company by company basis) over the next couple of weeks.

Regards,

David

Subject: RE: EPA presentation to AHI on 25 October 2016 on spot-ons

Sounds good for a call next week when you are back. I will note that last few bullets on Slide 14 indicate what our plans are with respect to next steps through Thanksgiving: 1) sending out to the individuals companies each's "revised" Excel spreadsheets, the SAS code used, and a narrative discussing what we found with respect to format, etc. ; and 2) a series of webinars/teleconferences with each (individual) company in mid- to late-November to talk through this.

While we can't share this information directly with you/SafetyCall, the individual registrants are of course free to share whatever we send back to them with you and to invite you on the call/webinar if they want.

David.

David,

Thanks so much for sharing! I had wanted to attend the AHI meeting but I'm in DC presenting at a CPSC meeting on incident data and flying tonight to California. Actually, I was hoping to catch up with you on some ideas and will still plan to give a call. I've been monitoring the spot on pilot with some of our clients that involved and I'm anxious to see how it progresses.

Anyway, I'll plan to give you a call when I'm back in the office next week.

My best,

Rick

Subject: EPA presentation to AHI on 25 October 2016 on spot-ons

Hello Rick,

I just wanted to mention to you that we gave a presentation yesterday at an Animal Health Institute-sponsored all-day workshop in Rockville. FDA and USDA were also there. The presentation we gave was on progress to date on spot-on products.

I attach what I gave. Note that this was an outside presentation to the public, so there are not concerns regarding sharing if you like. It does provide an update on where we are at now and where we see ourselves going – at least in the short term – with respect to the Pilot spot-on reporting for which 5 companies have volunteered. You are likely familiar with most of this already except for the most recent material, but the links provided to past presentations/documents can be nice.

Seemed to me to be reasonably-well received by the attendees.

if you have questions, feel free to contact me.

Regards,

David

Subject: RE: your voice mail on CSPA annual meeting in December

David,

Yes, I discussed with Beth Law from CSPA yesterday prior to emailing you and we would definitely like Mike to participate. I'm sure we can coordinate content so Mike will be up to speed. I'll be back to you both with additional details.

Thanks for your willingness to present on this topic. As you can imagine it is very timely and of significant interest to Registrants in light of big picture changes and discussions regarding future directions taking place within EPA on the AE front.

Stay tuned!

Rick

Hello again Rick,

I did hear back from Mike Goodis and he confirmed that he is attending the meeting and would be willing to discuss incidents as part of the CSPA Annual meeting if you would like. Could you please confirm that you still have interest in this topic with Mike G. being the lead.

I have cc'd Mike G. here, so feel free to communicate with him directly and to cc: me to help in coordinating Mike's preparation regarding incidents.

David.

Subject: your voice mail on CSPA annual meeting in December

Hello Rick,

Thanks for your voice mail and nice to hear from you. Unfortunately, I understand the meeting is not in the DC area so is not local. And -- unfortunately -- travel plans and budgets for December 2016 were originally set in fall, 2015 and the date for any "extra travel" during the October to December 2016 period has passed.

I have sent an email to Mike Goodis who you mentioned and is acting Division Director of Registration Division (and I think you said is attending the meeting) and he may be able to say a few words on incidents including how we use information on this in our risk assessments and where we hope to be going in the future (we can brief him so he is up to speed). He is out until 6 September so I don't have a firm answer from him on if he is going or would be willing to say perhaps a few words on this -- but he may be checking his email and may be able to reply.

In the meantime -- and on a bit of a different topic -- around 8- 10 EPA folks are intending to attend the AHI meeting in Rockville, MD (local) this year in and are planning on doing at least one or two presentations. Hopefully, you will be there too. It seems to be a very interesting and informative one-day conference.

David.
